Bret Farnum at Extreme Engineering has contributed this BSP for the 440GX platforms.

The boards supported by this BSP include:

- XPedite1000
- XPedite1001
- XPedite1002
- XPedite1010
- XPedite1032
- XChange1102
- XChange1104

Minor modifications may be required to get the BSP to run depending on the specific board. See the readme file, included in the zip archive, for instruction on using the BSP as well as the terms and conditions under which it is being made available.

Brett can be contacted at bfarnum@xes-inc.com

Download the BSP here.
