Community Members#

Foundry27 community members are entitled to a wide set of resources to help develop software on the QNX software platform.

Anonymous users#

Anonymous users browsing the foundry have read access to most of the portal's content with the exception of community downloads.

Registered community members#

Registered community members log into Foundry27. They can access community downloads and participate to forums by posting messages. Becoming a registered community member is free, all you need is to create a myQNX account.

Project members#

Project members are registered community members that are highly involved in the development of a Foundry27 project. Project members are approved by the sponsors of a given project. Although each project is free to manage access control to its resources, the following member roles are usually found in project:

- **Contributor:** can contribute to the wiki (except the project home page), documents and project downloads sections
- **Administrator:** has control over all resources found in the project

---

Details#

The following table summarizes the access generally offered to the various resources of projects hosted in Foundry27:

Resource	Anonymous	Registered Member	Contributor	Administrator
Home page	Read	Read	Read	Read/Write
Documents	Read	Read	Read/Write	Read/Write/ Administer
Tasks	Read	Read	Read/Write	Read/Write/ Administer
Source Code	Read (see note 1) (Web only)	Read (see note 2)	Read/Write	Read/Write/ Administer
Forums	Read	Read/Post	Read/Post	Read/Post/Administer
Reports	Read	Read	Read/Write	Read/Write/ Administer
Project Downloads	n/a	Read	Read/Write	Read/Write/ Administer
Wiki	Read	Read	Read/Write	Read/Write/ Administer

note 1: Some projects restrict their code to registered members, no web interface is then available to anonymous users. Such source is then only available from the QNX Source project.
