BICDS Introduction

A non-profit organization dedicated to the construction of the Binhai IC design industry chain as well as the development of its affiliated IC design companies

Binhai Integrated Circuit Design Service

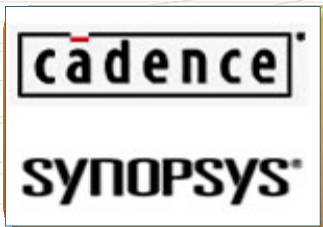

Established on March 2008 by Tianjin TEDA International Incubator

Providing places and basic facilities including single design and incubator room for small- or middle-sized IC design initiatives

World-class hardware configuration, such as Special SUN working station and Linux Server

Advanced design software (from Cadence and Synopsys) together with the hardware facilities to construct a professional technological support platform for the IC design companies

IC Design Industry Park

IC Design Industry Park

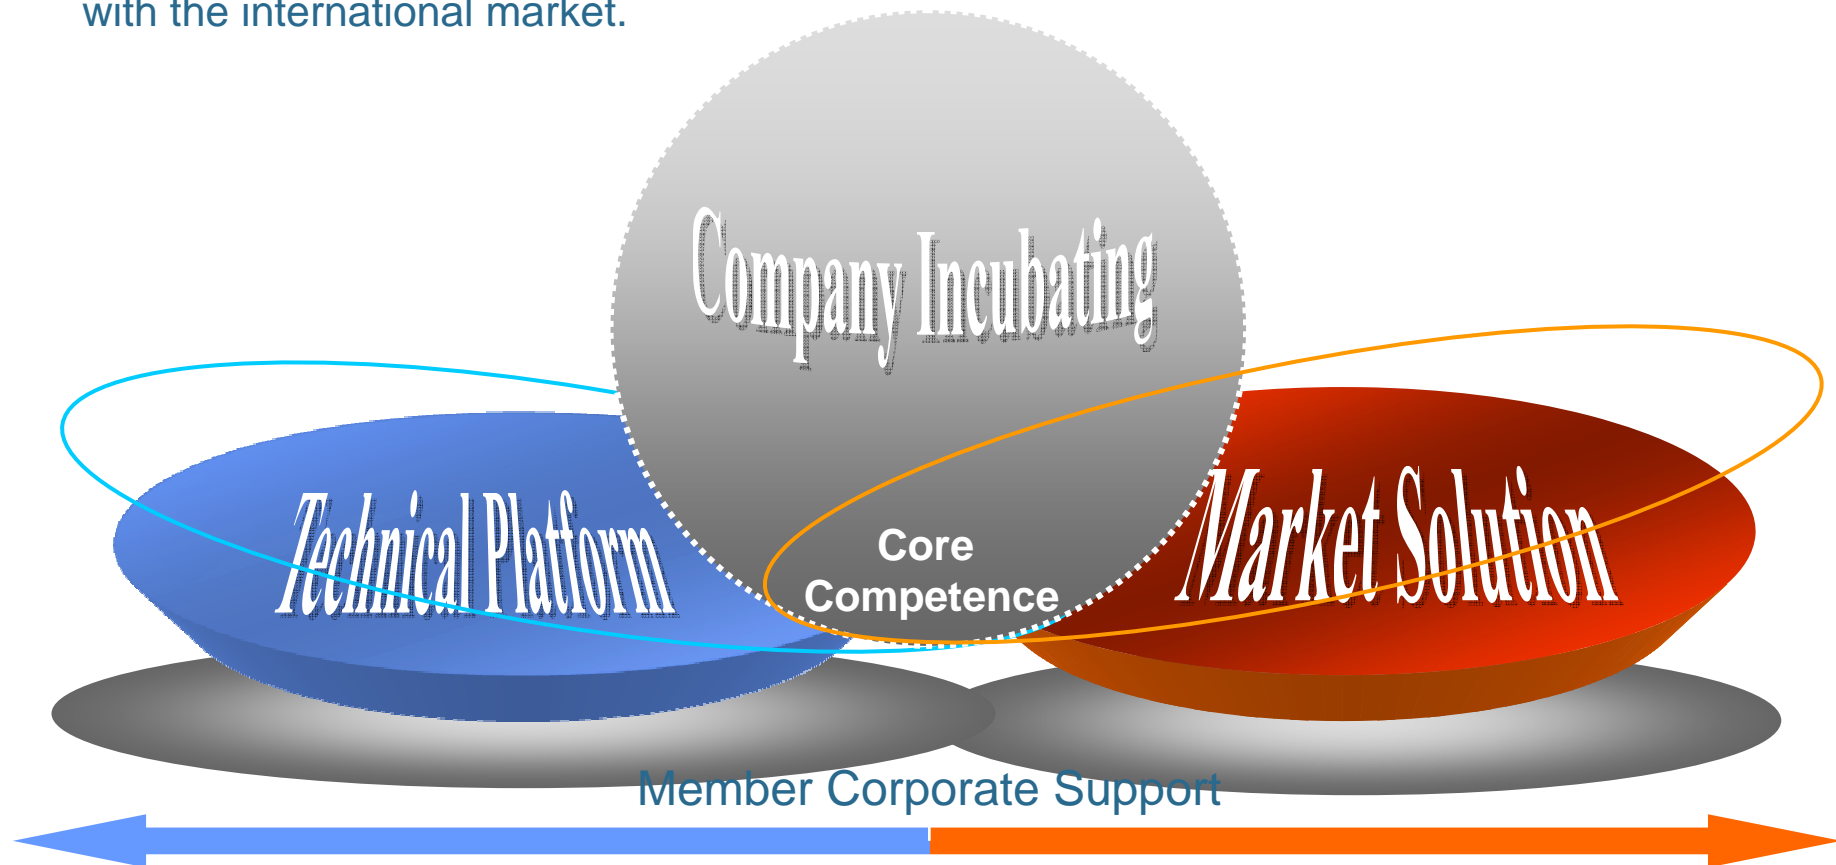

- Address: Center of Tianjin TEDA Service Outsourcing Park
- With an overall planning area of 20 thousand square meters, the park function could be divided into research and development and comprehensive service, creating a superior development environment to the IC design companies. For the time being, the initial design has been completed, and construction would be finished and put into use at the beginning of 2009.

About Us

BICDS aims at technical platform, company incubating and market solutions to lower the innovation cost and risks for its enterprises and to realize the industry chain construction and industry structure optimization, promote the whole local IC design industry to connect with the international market.

- **Technical Platform**

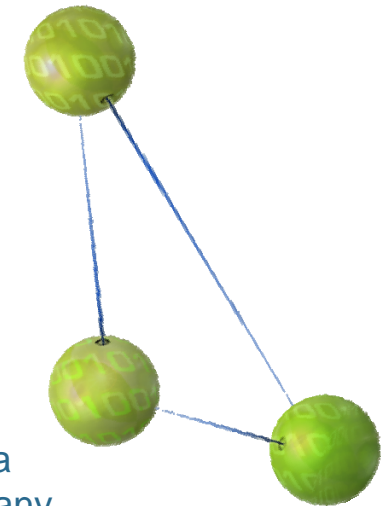

As the public technical service platform, BICDS provides conditions for the technical innovation via its multiple design services for its affiliated IC design companies.

- **Company Incubating**

Relying on the resources advantages of TEDA International Incubator, BICDS takes active measures to incubate medium and small IC design initiatives; attract investment and bring in international IC design companies; encourage overseas students and foreign experts to come to Binhai to found their own business; develop our own leading companies in IC design industry.

- **Market Solution**

BICDS attached much importance to the establishment and improvement of a globally radiated IC design transaction platform and national IC design company service platform. Through high-level operating mode, we are developing the new multi-area and e-commerce based market network, and to construct BICDS to be an influential brand in the international IC design industry.

Vision

Integrated Circuit design service platform opens to the whole world

Mission

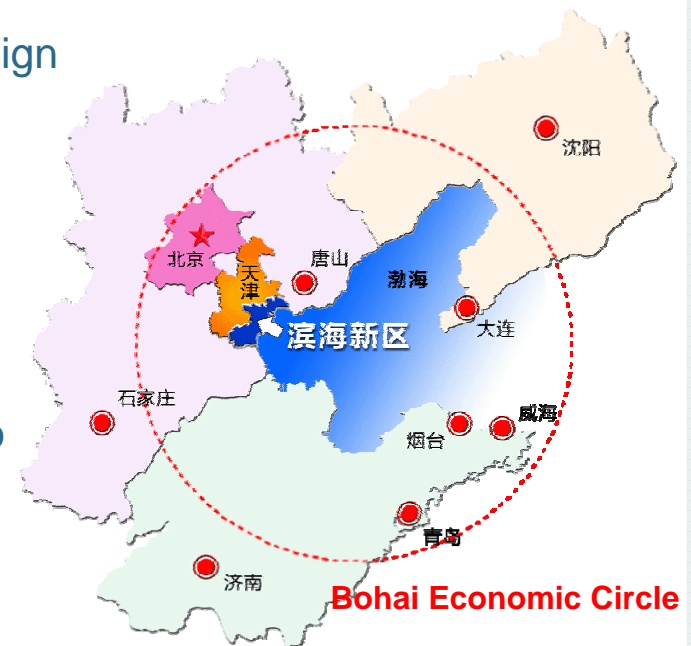

Company innovation capability incubating
Sharable company values establishing

Values

Market Orientation, Environment Construction,
System Innovation, Resource Integration, Company
Incubating

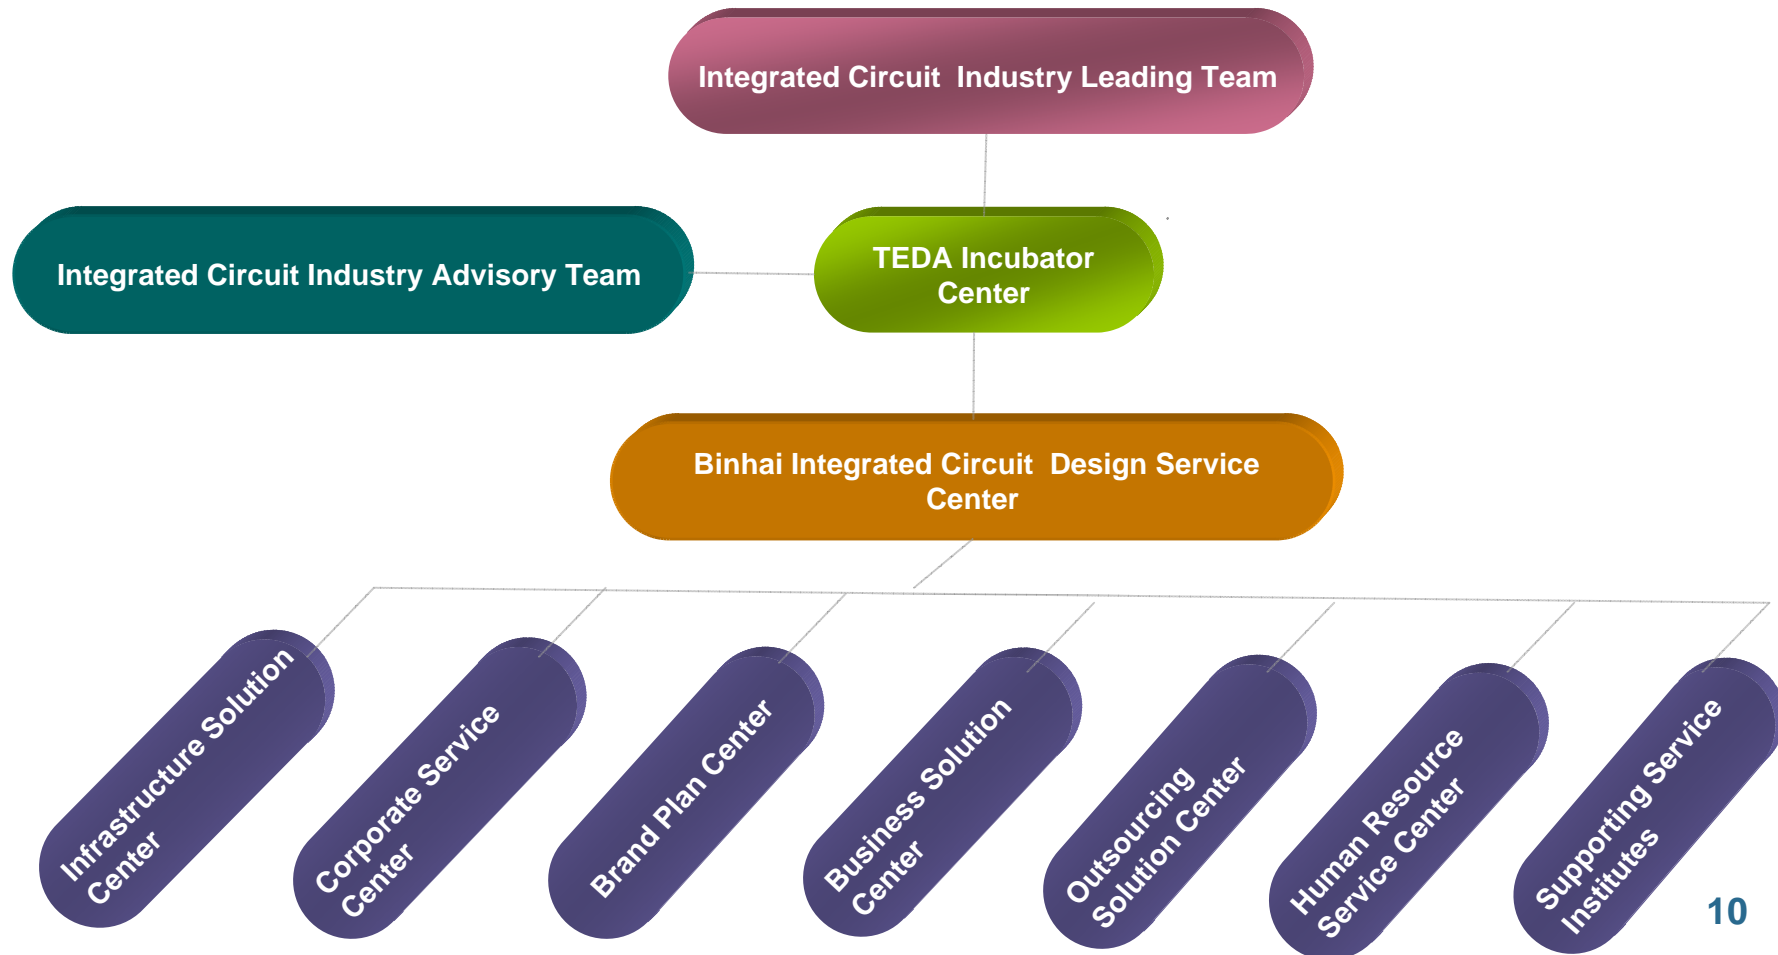

- Perfect place for MNCs to set up their inner IC design research and development center;
- Featured diverting city for the global IC design outsourcing;
- Strategical supporting city for Beijing's IC design industry;
- Service and transaction platform of China opens to the global IC design industry.

Administration Structure

Guided by Tianjin Integrated Circuit Industry Leading Team, BICDS will continuously improve service capacity and quality to serve the enterprises better comprehensive supports for their development and production transform.

Policy Support System

Besides general supporting policy, the following allowance are also enjoyed by the qualified IC companies.

1
**Research &
Development
Allowance**

2
**Software Cost
Allowance**

3
**MPW Cost
Allowance**

Powerful policy support is the lifeline of IC companies

4
**Industrial
Revenue
Allowance**

5
**Company
Listing
Allowance**

6
**Office
Renting
Allowance**

Advantages of BICDS

- Binhai New Area (TBNA)
Development and policy advantages of Binhai New Area as the third pole of China's economy
- Industrial Environment
Rich energy sources and swift improvement in basic environment like transportation, logistics etc.
- Abundant Human Resource
- Huge local Market
Developed local information and modern manufacture industry, exist huge potential requirements
- IC Industry Chain
Great break-through on investment attracting, a complete IC industry chain formed
- Industry Strategy Platform
Advantages of Backwardness and technology of the new IC design service platform
- Preferential Policy Support
Favorable policy & powerful support from government to push the development of IC industry

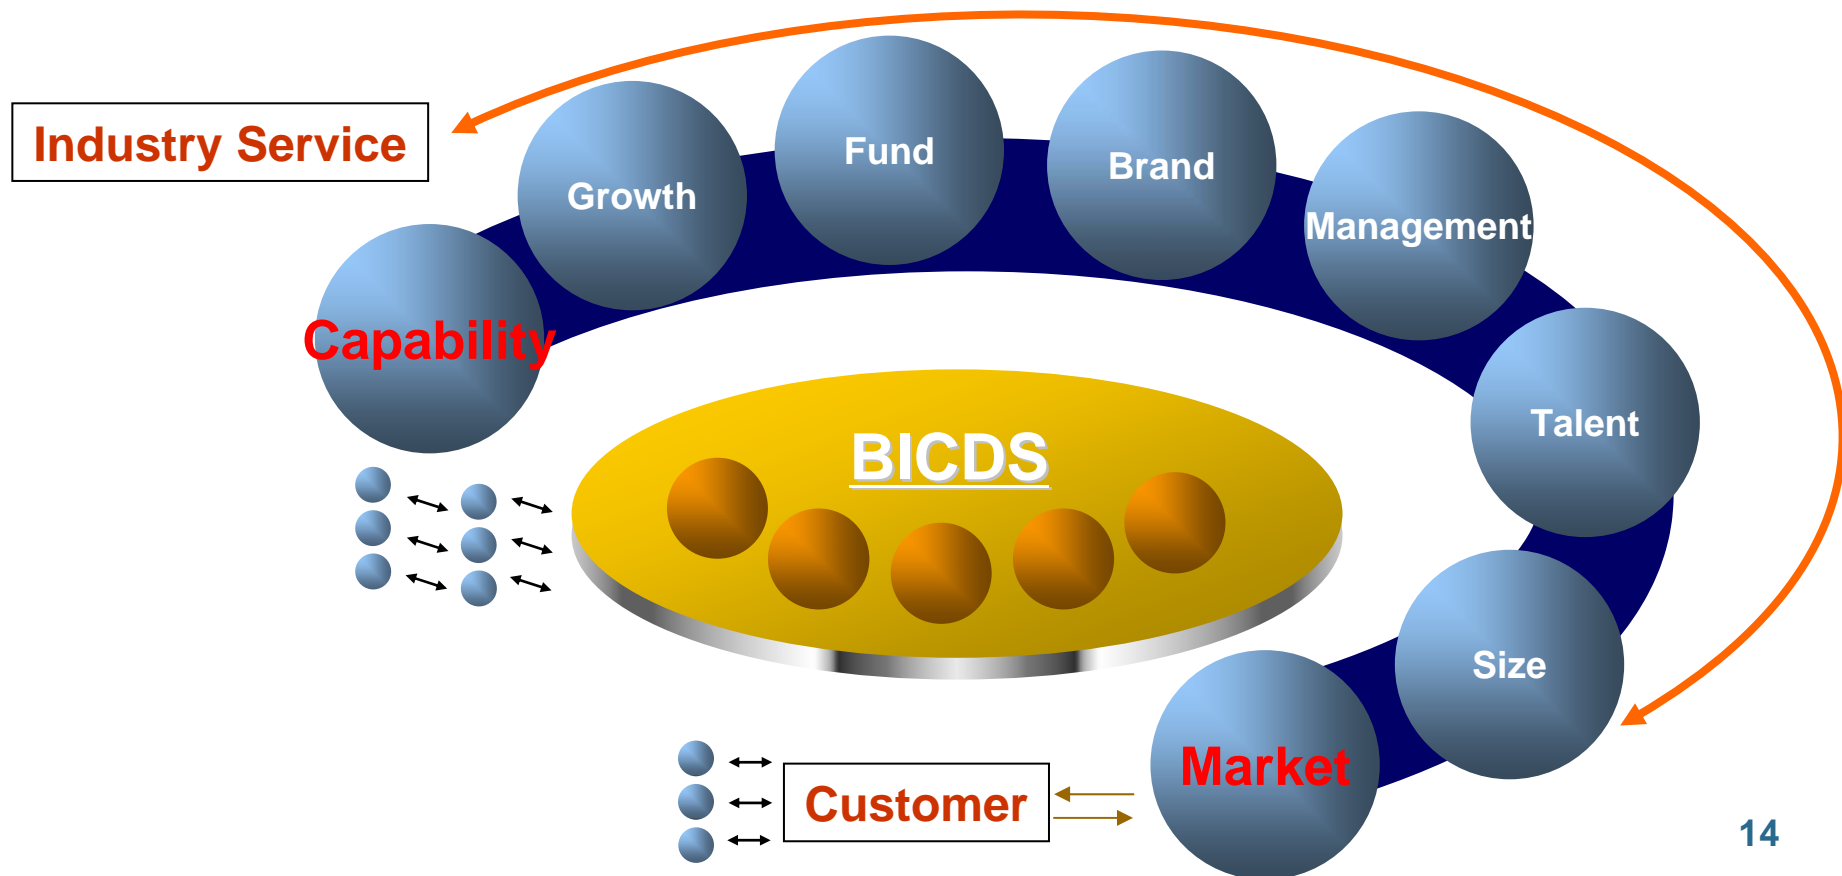

Our Services

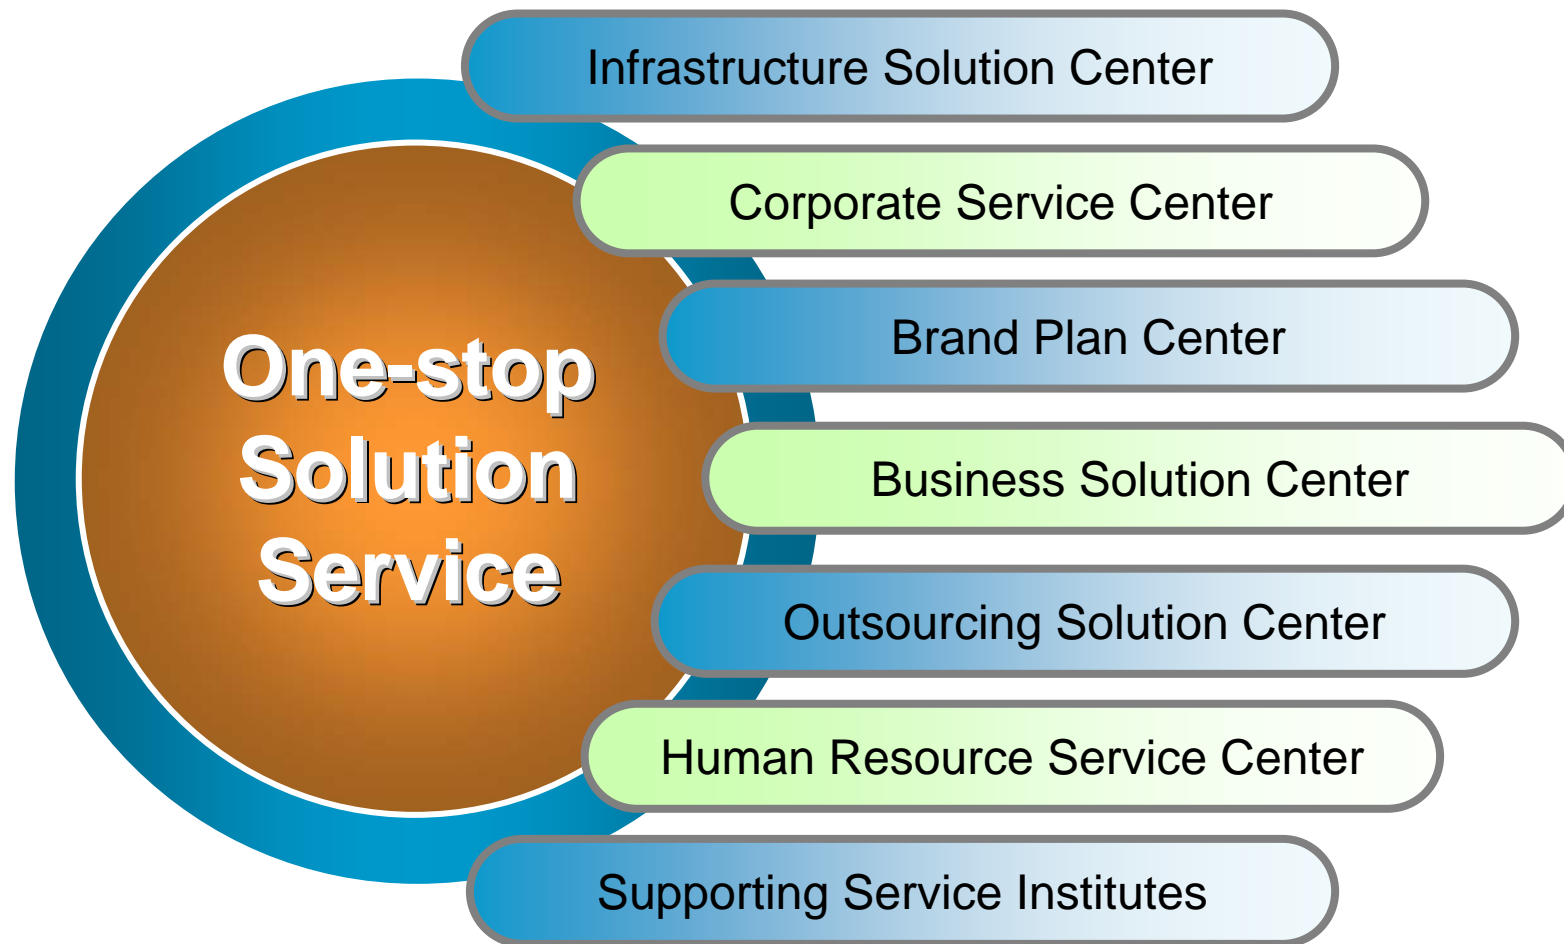

BICDS provides one-stop solution service to support the growth of its member companies from infrastructure offering, technical support to market solution etc.

One-stop Solution Service

Market is the first domino for the long-term development of IC corporate which contribute a lot to the benign circle of affiliated IC design companies of BICDS.

Infrastructure Solution Center

- Standing in the current public technology service platform to provide all-around IC design technology service
- EDA design service
- MPW&IP consulting service
- Park services after the IC Design Industry Park construction finished
- Special basic facility and public platform service for IC design companies in different industries with different sizes, service set formed

Corporate Service Center

- Providing necessary living, transportation, accommodation et. Service
- Preferential Policy Consulting and Implementation Service
- Business Negotiation, Corporate Reception, Public Meeting Room, Video Meeting and other public services
- Printing, design and commerce center service
- Corporate Financing Service
- Corporate International Certification Service
- Investment Attracting and Consulting Service
- International Cooperation and Intercommunication Service
- Incubator services focused on initial IC design companies: Business Starting Consulting Service, corporate incubator service, Student abroad business-starting service, investment consulting service, and estate management service etc.

Brand Plan Center

- Corporate Brand Construction Service
- Website Construction and Promotion Service
- Advertising Document Preparation Service
- Domestic and Foreign Exhibition Service
- Global Road-show and Promotion Service

Business Solution Center

- Corporate Market Promotion Service
- Corporate Management Consulting Service
- Competition and Industry Information Service
- Product and Project Consulting Service
- Scientific Research Project Consulting Service

Outsourcing Solution Center

- Commercial Communication Service
- Business Document Service
- Business Negotiation and Site-visit Service
- Process and Quality Control Service

Human Resource Service Center

- Public training Service
- Professionals Training Service
- Recruitment and Head-hunting Service
- Talents Bring-in Service
- Human Resource Storage

Supporting Service Institutes

- Training Cooperation and Service Institutes
- universities and research institutes
- Industry Union and Association
- Market Promotion Service Institute
- Certification Service Institute
- Exhibition & Conference Service Institute

Alliance & Members

Establish extensive strategical alliance to construct the brand of BICDS, expand its influence in global IC design industry and promote the development of its affiliated IC design companies

Partner and Members

CHINASOURCING

Chinasourcing (<http://www.chnsourcing.com>) is the strategical partner and advisor of BICDS.

Affiliated IC design companies of BICDS
