Installation notes for Filesystem drivers, system processes and utilities.[#](#)

To install your filesystem drivers:

1. Download the filesystem driver from [Software Updates](#) page.

2. Compare the cksum results with the checksum posted on the Software Updates page.

 # cksum Fsys.atapi

3. Backup the existing filesystem driver.

If you wish to keep a copy of the existing driver, you'll need to save them to a safe location first, to prevent them from being overwritten during installation.

 # cp -vc /bin/Fsys.atapi /bin/Fsys.atapi.`date +"%y%m%d_%H%M%S"`

4. Copy the updated driver to the **/bin** directory:

 # cp Fsys.atapi /bin

5. Make sure that the binaries are executable and that the file's owner and group are correc:

 # chmod 775 /bin/Fsys.atapi

 # chown root:root /bin/Fsys.atapi
