BSP and Driver Status#

QNX

Officially released by QNX on a specific reference platform. QNX will provide support for issues which can be reproduced on the reference HW platform and using the BSP binaries shipped with the reference BSP package or generated from its source. See the support pages for the conditions and terms under which support will be provided.

Experimental

Supported by the QNX Community, but considered experimental and not officially released by QNX. If you need support for such a BSP, or device driver, please contact QNX Sales.
