

Product Brief: The Intel® EP80579 Integrated Processor product line is the first in a series of breakthrough system on-a-chip (SOC) processors, delivering excellent performance-per-watt for small form factor designs.

Product Support Note: QNX has begun support for the Intel EP80579 with our generic X86 BIOS distribution. The purpose of this BSP is to provide source code for the most common x86 drivers necessary to boot QNX Neutrino on an x86 board with BIOS. The x86 BIOS distribution may be found here: [x86 BIOS](#)
Please check back with us regularly as support of this design expands.

Please send application notes and input regarding QNX extended support requirements for this part, to:
[QNX Community Management Group](#)

WHERE TO BUY HARDWARE:

* Kontron AG/Kontron America * information: www.kontron.com * email: info@us.kontron.com
