

devnp-e1000.so network driver<#>

This is the latest version of the devnp-e1000.so driver. Support has been added for the Intel i350 line of gigabit Ethernet controllers.

Last Update	Driver	Platform	Checksum	
2012-03-23	devnp-e1000.so	x86		
2012-03-23	devnp-e1000.so	arm		
2012-03-23	devnp-e1000.so	armv7		
2012-03-23	devnp-e1000.so	ppc		

Installation notes for x86 systems<#>

1. After you have downloaded this driver, run "cksum devnp-e1000.so" and compare it with the above checksum
2. Make a backup copy of /lib/dll/devnp-e1000.so as well as \$QNX_TARGET/x86/lib/dll/devnp-e1000.so
3. Copy the new driver to /lib/dll as well as \$QNX_TARGET/x86/lib/dll

Installation for other targets<#>

1. Run cksum against the driver as for x86 above
2. Make a backup copy of \$QNX_TARGET/target/lib/dll/devnp-e1000.so
3. Copy this driver to \$QNX_TARGET/target/lib/dll
4. Rebuild your boot image to include the new driver
