Drivers Directory#

QNX provides a wide variety of device drivers. The list of supported devices and hardware are on the driver pages below:

- USB
- Network
- Wireless Network
- Touchscreen
- Block and Flash
- Audio
- Printers
- PC Card
- CHAR
- Input-keyboard and mouse
- video

A searchable database of supported HW drivers can be found here.

Drivers for a wide range of hardware are shipped with the QNX Momentics releases. Drivers are also made available in GA patches. Before being included in a release or patch, drivers will also be made available for download from their specfic driver page. To navigate to the location of a specific driver, see the release and patch driver availability page.

Driver development kits are available for audio, graphics, network, character input and USB can be found on the DDK page.
