

QNX SDK for Bluetooth Connectivity 1.0 BSPs#

These BSPs have been validated in conjunction with the QNX SDK for Bluetooth Connectivity 1.0 release. Later versions of these BSPs may exist in the main F27 repository. Please consult release notes to determine if migration to a later BSP version better meets the needs of your project.

(Note that these BSP versions are identical to those provided for the QNX SDK for Apps and Media 1.1. The sample build files and make files provided in the add-on packages below are specific to the QSBC 1.0 release.)

| Last Update | Platform | QNX Neutrino version | Processors | Provided By |
