

BSP Directory#

This directory provides the list of Board Support Packages available for the QNX Neutrino RTOS.

Other Resources#

- [Community Hardware Support](#): A list of community contributed drivers and BSPs are available in the Bazaar
- [Experimental Drivers and Utilities](#) A list of experimental drivers and utilities developed by QNX but not released yet.

Please review the BSP details page and release notes for support information as some of the BSPs are not provided or officially supported by QNX.
