

Installation and Release notes for the Tcpiip manager.<#>

Tcpiip - socket manager (TCP/IP stack 5.10)

Last Update	Archive	Release Notes	Checksum
12-05-2012	Tcpiip.20120510.tar.gz	txt	734838731

Changes:<#>

- fixed an error which cause termination of the Tcpiip manager by SIGSEGV when uninitialized addrlen parameter in accept() function is used.

Installation notes<#>

To install the Tcpiip manager:

1. Download the archive with the Tcpiip manager.
2. Compare the cksum results with the checksum posted on the Latest Software Updates page.

cksum Tcpiip.20120510.tar.gz

3. Unpack the driver:

zcat Tcpiip.20120510.tar.gz | tar x

4. Backup the existing Tcpiip manager.

If you wish to keep a copy of the existing driver, you'll need to save it to a safe location first, to prevent it from being overwritten during installation.

cp -vc /usr/tcprt/5.10/usr/ucb/Tcpiip /usr/tcprt/5.1/usr/ucb/Tcpiip.`date +"%y%m%d\_%H%M%S"`

5. Copy the updated driver to the /usr/tcprt/5.1/usr/ucb directory:

cp Tcpiip /usr/tcprt/5.10/usr/ucb

6. Make sure that the binaries are executable and that the file's owner and group are correct:

chmod 755 /usr/tcprt/5.10/usr/ucb/Tcpiip

chown root:root /usr/tcprt/5.10/usr/ucb/Tcpiip
